

Disney
MALEFICENT

LOOK LIKE AURORA

AURORA DRESS

collar

Layer a peasant shirt under your dress and tie it so that it peeps out from under your dress.

sleeve

Gather the sleeves from the wrist along the top and secure.

belt

Create a long belt from your left-over fabric to tie around the waist.

embellishments

Add rhinestones and golden embellishments like the ones in Disney's Maleficent to finish the Aurora dress.

dress

Use this pattern to create the medieval style Aurora Dress.

AURORA WATERFALL TWIST

You will need: Hair clip | Hair elastic | Hair spray | Curling iron | Flowers

Directions: Have an adult help you.

1. Take a small section of hair close to your temple, split it in half.
2. Twist the bottom half over the top half.
3. Let the former top half fall and pick up a new piece from underneath.
4. Repeat steps 2-3 by twisting the new bottom piece over the top piece.
5. Once you reach the middle of the back of your hair, secure with a clip and save for later.

6. Repeat on the opposite side. Once both sides are finished, tie them together with a hair elastic.
7. Divide the loose ends into 2" sections and create waves with your curling iron. Lightly dust with hair spray.
7. Finish the look by gently loosening the twist with your fingers.
8. Weave in several flowers.

MALEFICENT SCEPTER

Fashion Your Very Own
Maleficent Scepter

Instructions

You will need:

A Stick

About 4 feet in length and 1 inch round

Modeling Clay

The non-toxic kind from your local craft store

A Ball

Clear plastic, 3 inch tree ornament works great.

Acrylic Paint & Brushes

Brown and black for the staff. Blue and yellow for the ball.

Glue

Hot glue works best but another non-toxic glue may be used.

Have an adult help you with this activity.

Step 1: Glue your ball to the top of your stick. If your stick is tapered, your thick end should be the top.

Step 2: Roll out 6 pencil-sized, 12 inch lengths of modeling clay.

Step 3: Drape your clay strands over the ball on top of your stick, crisscrossing them in areas and shaping them to look like roots or vines holding the ball.

Step 4: Wrap the rest of your staff in a layer of modeling clay about 1/8–1/4 inch thick.

Step 5: Blend and texturize the clay to make it look as natural as possible. Let dry.

Step 6: Paint the entire exterior of the staff except for the ball. Making sure to get paint into the crevices. Use a finer brush to paint the clay pieces wrapped around the ball on top. Let dry. Then, lightly paint brown over the surface using a flat or foam brush. You should still see hints of black underneath and in the grooves and cracks. Let dry.

Step 7: Carefully paint the ball on top between the strands of colored wood-like clay. Start by bushing on a thin layer of blue, then, add your yellow highlights. Play with different blending techniques until you achieve the desired effect.

MALEFICENT
Young Maleficent Look

WINGS & HORNS CRAFT

Recreate the magical forest look of young Maleficent!

YOUNG MALEFICENT HORNS

You will need: A sturdy headband | 2 cardboard toilet paper rolls | Paper towels | Aluminum foil | A roll of self-adhesive bandage | Hot Glue | Brown acrylic (non-toxic) paint

Have an adult help you. Step 1: Create your first horn shape by stuffing your toilet paper roll with rolled up paper towels. Allow the paper towels to stick out of one side of the roll. **Step 2:** Wrap your paper towel and roll with aluminum foil several times then shape your first horn into the curve shape of one of Maleficent's horns. Your horn should be about 12 inches in length, 1 inch at the base and tapered to a point.

Step 3: Create your second horn shape, same as the first. Making them look at similar as possible. **Step 4:** Wrap your horn shapes in self-adhesive bandage. Try wrapping each of them the same way to make them look uniform. **Step 5:** Use hot glue to attach your horns to your headband, in a position similar to Maleficent's horns. **Step 6:** Wrap 5 inch lengths of bandage under the headband and up the sides of each horn, then, wrap the bandage up the sides with additional bandage around the horn shape. **Step 7:** Paint your horns with brown acrylic (non-toxic) paint and let dry.

YOUNG MALEFICENT WINGS

You will need: Corrugated cardboard 48" x 48" | Cotton batting or foam 1 inch thick 54" x 54" sheet | 2 sheets of feather patterned fabric 54" x 54" | Elastic straps | Adhesive spray | Fabric tape | Box cutter | Scissors | Sharpie or Crayon | 4 large, heavy-duty safety pins | Black duct tape

Have an adult help you. Step 1: Fold your cardboard in half along the corrugated ribbing. **Step 2:** Draw the half wing shape shown in the diagram on your cardboard. **Step 3:** Use a box cutter to carefully cut out the shape. **Step 4:** Open up your cardboard shape, place on top of your foam or batting sheet, then, use scissors to cut your batting or foam sheet 2-3" larger than your cardboard shape. **Step 5:** Cut your feather pattern fabric out 1-2" larger than your batting or foam sheet, making sure your feather pattern is positioned correctly like in the picture. Then, cut your second piece out to the same size and shape as your cardboard. **Step 6:** Use spray adhesive to attach your batting to the center of your wing-shaped cardboard. **Step 7:** Flip your board over, then, wrap and attach your additional 2-3" batting edge to the cardboard using fabric tape or spray adhesive along the edge. **Step 8:** Repeat steps 6 and 7 to attach your larger fabric shape to the outside of your batting or foam wrapped board. **Step 9:** Cover up the excess fabric wrapped around the inside edge of your wings with your second, smaller, piece of fabric. Use adhesive to position the overlying fabric in place. NOTE: This step is meant to clean up the inside look of your wings. Hemming, stitching and/painting may also be used per your discretion. **Step 10:** Position your wings on your back where you want them to stay and have someone mark the areas where you want your elastic straps to attach. Your attachment points should be under your armpit and directly above on your shoulder. Cut your elastic bands to size leaving an extra 4 inches to attach (2") at top on bottom. Attach your bands to your marks using heavy-duty safety pins. Try on and adjust as needed. Once your bands are attached in correct position, cover the safety pins with black duct tape to protect from potential pin opening.
